

## CD Label with Vinyl-Look

Result:  
offset printing  
(6c)

Result:  
screen printing  
(4c)

Detailed view:  
printed „grooves“

### Version 1 – Offset Printing

- 1st colour** White base (undercoating) 118 to 18 mm (screen printing)  
**2nd to 5th colour** until 4-coloured CMYK (euroscale/ offset)  
**area 118 to 62 mm: 4-coloured black** (75%C/ 75%M/ 75%Y/ 100%K)  
**area of 62 to 18 mm:** you can create your individual „LP label“.  
**6th colour** 1-coloured black = the "grooves" (screen printing).  
*(P+O has the artwork data for "grooves" on hand!)*

### Version 2 – Screen Printing only

- 1st colour** White base (undercoating / full or partial) ensuring colour compliancy of the print on both silver and transparent surfaces of the CD.  
**2nd to 4th colour** Special colours (true colours) according to HKS-K or Pantone-Solid-C colour guide in the **area of 62 to 18 mm\***.  
**5th colour** 1-coloured black in the **area of 118 to 62 mm** (also possibly in the „LP label“ - **62-18 mm**)  
**6th colour** 1-coloured black = the "grooves" (screen printing).  
*(P+O has the artwork data for "grooves" on hand!)*

**PLEASE NOTE:** -We have to print „black“ twice to create the „grooves“ / vinyl-look.  
 -\*Please consider also the written note how to create data. Have a look at our homepage under "[Service](#)" / "[Label - information for data creation](#)"!
