

Automatic assembly of stickers | Product Specification

only for square, round and oval stickers

sticker size:

min. edge length: 10 mm

The carrier tape must be at least 40 mm wide.
Otherwise, the stickers must be assembled by hand.

max. edge length: 150 mm

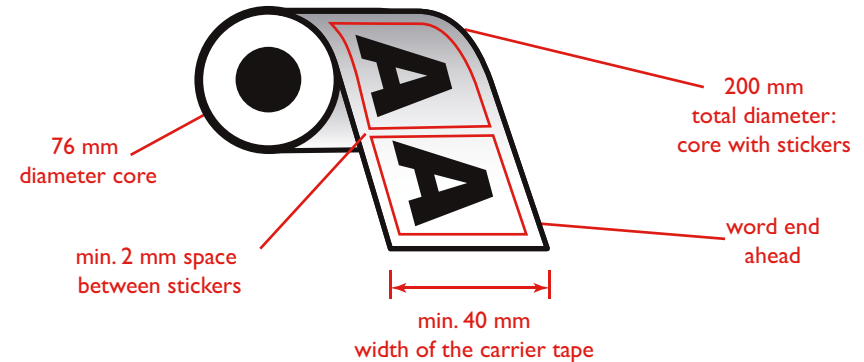

delivery of stickers on carrier roll:

- core diameter: 76 mm - total diameter core with stickers: 200 mm
- space between the single stickers on roll: min. 2 mm
- single lane outer winding - word end ahead

Please note:

The sticker must be placed at least 5 mm from the outer edge of the cover.

When applying the sticker an offset of up to 5 mm is possible. This means barcode stickers that have to cover existing codes should be 6 mm wider / higher than the printed code.

Example of possible positioning on the covers:
